

Week 7 - Hampus Edeland

What do I want to learn or understand better?

We've used Chalmers store API, which has given me an insight into using API:s. I would like to explore and understand the use of API:s better. Learn more about using Firebase and Firestore. Maybe learn a bit more about the parts of the project I haven't been that involved in.

How can I help someone else, or the entire team, to learn something new?

Maybe help someone with Firebase and Firestore. Otherwise the same as the other weeks. Help to implement some parts of scrum in future projects.

What is my contribution towards the team's use of Scrum?

I've had the role of scrum master in most of the sprints. Participating and leading meetings in the start of the sprint and in the reflection meetings. Also contributing to the scrumboard, helping define user stories. This week it has mostly been bug fixes and some polishing to do.

What is my contribution towards the team's deliveries?

Helping with a few user stories, mostly handling bug fixes. Trying to prioritize the work that needs to be done to deliver a polished MVP. Trying to help in partner-programming with some of the last user stories. Finishing the tasks I took on.
