Week 7 reflections

What do I want to learn or understand better?

For this week, I'm beginning to understand the scrum practices better and the user stories and task breakdowns has gone more smoothly. Still struggling a bit with the programming side, and also not completely comfortable with the scrum practices.

How can I help someone else, or the entire team, to learn something new?

Unfortunately, same answer as previous weeks, not much really.

What is my contribution towards the team's use of Scrum?

Like previous weeks, I have participated during the meetings and discussions. Other than that I don't know how else.

What is my contribution towards the team's deliveries?

I've contributed towards the team reflections assignment and have been working on my user stories.
