What do I want to learn or understand better?

Together with the group, we feel that we are getting better at most of the elements we have learned. But the creation of user stories can be further developed. I also want to be more independent when writing code.

How can I help someone else, or the entire team, to learn something new?

During this sprint there has been a lot of focus on writing code, where I feel I'm learning a lot and teaching less. However, I always pay attention to scrum, and reminding about the framework when something deviates.

What is my contribution towards the team's use of Scrum?

I have assisted scrum master during meetings for weekly reflections. I have also been contributing to the scrum board.

What is my contribution towards the team's deliveries?

This sprint I have been working together with Emil on our assigned user stories. We have also documented and reflected on the sprint.
