Week 4

What do I want to learn or understand better?

My knowledge of how scrum is implemented in practice has increased, but I want to develop my knowledge even more. I also want to develop my skills of how to break down tasks and user stories so that the work becomes more clear and the estimation better.

How can I help someone else, or the entire team, to learn something new?

When problems arise, try to find and learn the tools that scrum offers to solve them.

What is my contribution towards the team's use of Scrum?

I have assisted scrum master during meetings for reflection on the previous sprint and planning of the next sprint. Also tried to create more well-defined user stories.

What is my contribution towards the team's deliveries?

I have helped to structure the work, documented and reflected on this sprint. Also become more integrated into the work that the development team does.
